SUMMARY

Full Stack Developer with hands-on experience in developing web applications and AI-powered solutions. Skilled in React, TypeScript, Java, Spring Boot, Node.js, ASP.NET Core, and MySQL, with experience building RESTful APIs, secure systems, and end-to-end full-stack applications. Passionate about AI development and integrating generative AI into practical software solutions. Currently pursuing a BSc (Hons) in Software Engineering at NSBM Green University and have completed a Higher National Diploma (HND) in Software Engineering at the Institute of Software Engineering (IJSE).

SKILLS

Java | Python | JavaScript | TypeScript | PHP | React | React-Native | SpringBoot | Node.js | Express.js | Hibernate | Prisma ORM | .NET Core | #C | Maven | JWT | MySQL | Git | GitHub | Figma

PROJECTS

AI Powered Recruitment and Talent Management Platform ,
React 18.3 | TypeScript | Tailwind CSS 4.0 | .NET 8 | ASP.NET Core | C# | MySQL | JWT | Swagger

- Developed a **full-stack AI-powered recruitment and talent management platform** to streamline candidate management and recruitment workflows
- Built responsive user interfaces using **React.js** and developed **RESTful APIs with ASP.NET Core** for seamless frontend-backend integration
- Designed and managed a **MySQL relational database** for handling candidate, job, application, and recruitment-related data
- Integrated **Google Gemini AI** to implement AI-powered recruitment features and applied **role-based access control** for secure user workflows

Crop Monitoring System, *Spring Boot 3.3.5 | Java 17 | MySQL | Spring Security | JWT | Hibernate/JPA | Maven*
Backend , Frontend

- Developed a **secure RESTful backend API** for a crop and farm management system using **Spring Boot** and layered architecture.
- Implemented **crop and field management functionalities**, including CRUD operations, crop image handling, and search/filtering capabilities.
- Implemented **JWT-based authentication and role-based access control** using Spring Security, with secure password storage using BCrypt.
- Designed and managed **MySQL database integration** using Hibernate/JPA, with DTO validation, ModelMapper, and structured Controller, Service, Repository, and Entity layers.

Car Rental Management System, *React 18.3 | TypeScript 5.7.3 | Node.js 22 | Express.js 4.21.2 | Prisma 6.3.1 | MySQL | Redux Toolkit | Tailwind CSS | Axios | REST API*
Backend , Frontend

- Developed a **full-stack car rental management system** with separate React frontend and Node.js backend applications.
- Built responsive user interfaces using **React.js, TypeScript, Redux Toolkit, and Tailwind CSS**, including car browsing, booking, and customer management workflows.
- Developed **RESTful backend APIs using Node.js and Express.js**, implementing authentication, car management, customer management, and booking-related operations.
- Designed and integrated the **MySQL database using Prisma ORM**, with structured models and API communication using Axios.

EDUCATION

BSc (Hons) in Software Engineering, NSBM Green University 02/2025 – Present

Higher National Diploma in Software Engineering, Institute of Software Engineering 02/2023 – 01/2025
